Greek Rosés

Greek rosé wines are usually made from a blend of indigenous grape varieties and cosmopolitan grapes, such as Merlot, Syrah, Grenache for the most part. Rosé wines have become very popular and it is certain a world wide trend, so Greek wine producers are following the steps of Provence rosés. Their pairing with the Mediterranean cuisine is great as rosé wines's red fruits and acidity balances with the tomato sauce based dishes and the sea foods. We suggest, among others, Xinomavro rosés -more mineral- or Moschofilero -more flavorful- and why not, some Grenache, Merlot and Syrah based blends.

Greek Reds

Greek red wines have gained their fair share in the Greek gastronomy. In a country traditionally labeled as a «white wine country», red wines are now almost equally produced and consumed in Greece. The main red grape indigenous varieties are the fruity Agiorgitiko from Nemea in Peloponnisos, the more mineral and multi-faceted Xinomavro from Naoussa and the Northern part of Greece, while Mavrotragano, Mandilari, Limnio, Mavrodaphne and many others give wines worth trying. The majority suggested here are big and intense for the bold red wines aficionados and they reflect the new Greek red wine era, which is undoubtedly worth trying.

A unique blended gin from individually distilled botanicals including grapefruit peel, wild ivy, tea leaves, and Damask rose, as well as the rare flower from the Queen of the Night cactus, which blossoms in the North American desert for just one night a year.

It's then rested for 71 days in three cask types: medium-toasted virgin European oak, Pedro Ximénez sherry, and Cognac casks. After resting, the casks are blended together to make this beautiful gin with a golden hue. A luxurious drink for any occasion.

GIN

AMAZZONI BRAZILIAN GIN

700ml / 42%

Amazzoni is not only the first premium gin to have its own dedicated distillery in Brazil, but it also brings together five ingredients from this land that have never before been explored as botanicals in a gin: Next to the classic juniper berries, bay leaf, lemon, coriander, mandarin and pink pepper, ingredients from the heart of the Amazon forest were selected for the first time: cacao, Brazilian walnut, maxixe, victoria regia and cipò cravo. A singular, silky in texture premium gin that excels in every classic cocktail, ideally for the summer G&Ts.

Gin

COTSWOLDS DRY GIN

700ml / 46%

This awarded Dry Gin comes from the most beautiful region of England, the Cotswolds village.

Juniper berries, coriander seed and angelica root form the classic foundation. Then Cotswold lavender from nearby Snowhill and bay leaves are added. The citrus element comes from freshly-peeled lime and pink grapefruit zest - unusually they use fresh peels rather than dried because of the greater quantity of essential oils. This entails peeling several hundred limes and grapefruits per week, by hand! The final botanicals are cardamom seed and black peppercorn, to give a hint of spice. Cotswolds Dry Gin is renowned for its distinctive cloudy appearance when mixed with ice or tonic, due to the high essential oil content of the herbs and citrus fruits used.
